▪ Nepal	65
▪ Pakistan	69
▪ Srilanka	71
Supplier Section	77 to 86
▪ Publishing Systems	78
▪ Pre-Press	80
▪ Press	81
▪ Press Consumables	84
▪ Post-Press	86

Setting up the right infrastructure and systems has always been a challenge for any organisation. More so, when such decisions involve spending millions in dollars, as is the case with the newspaper business. The competition from within the industry and from new media has ensured that newspapers constantly upgrade their infrastructure to achieve business growth.

WAN-IFRA has been in the forefront advising and providing support to its members on the latest developments in business and technology. There has always been a demand from such members for a publication that will list the infrastructure – prepress, press and mailroom equipment used in various newspapers as well as a comprehensive list of suppliers of various products and services in every region. To satisfy such a need, IFRA had published its first Asian Newspaper Directory in 2001-2002. The directory is now updated with the data of South Asian Newspapers and related suppliers.

The collection of data is the result of close to a year of hardwork with full cooperation from our members. Apart from the listing of infrastructure, the directory also provides data about key personnel and department heads of different media houses. The section on suppliers will help the newspapers to connect with the vendors in each region.

We hope to make this directory a biennial publication and the next edition is planned for 2013-14. In the next edition, we will try and improve the directory to make it more comprehensive. Finally, we hope that this directory would be a reference guide to our members and to the industry at large in the South Asian region. We thank all the newspapers and advertisers for their support.

Multi-channel Distribution (web, tablet, smartphones, in print...)
Business Intelligence – Subscriptions Management, Paid Content, Geo-Targeted Marketing

savings in cost
services
efficiency

RESEARCH AND MATERIAL TESTING CENTRE

Does your newsprint and newsink give the best ink mileage?

Standardise your newsprint and newsink to ISO 12647-3

Studies have shown that inks with better pigments and rheological properties can give 15% to 20% more mileage than other inks. Newsprint with good surface characteristics can contribute to another 15%, thus giving a total of 35% more ink mileage.

After all, money saved is money earned.

WAN-IFRA's Research & Material Testing Centre can help you provide a solution to find the ink mileage even before the materials reach your press room.

400 million readers daily.

One out of three newspapers in the world is printed on a manroland press.

From newspapers to magazines, classified ads to double-page spreads, and from print-to-web and web-to-print, newspapers are changing and printing presses are changing too. With its unequalled experience in hybrid printing and its expertise in a wide range of formats, manroland sets the standard when it comes to flexibility in production. Take advantage of manroland's groundbreaking developments in automation to open up new lines of your business and secure your company's future. WE ARE PRINT.®
